

THE MEGAPHONE

Show Up Everywhere, Consistently

*Accounts set up, a real plan, and a steady stream of content
that turns one idea into posts for every platform.*

THE SETUP

First, we build the stage

Before a single post goes out, we set up your accounts properly so they look like one brand and are ready to grow.

- ✓ Set up and brand your accounts: Instagram, Facebook, TikTok, Pinterest, and YouTube, matched to your customers
- ✓ Write the bios, add the links, and apply your colors and logo across every profile
- ✓ Connect everything so posting and scheduling is simple from one place

Then, the content system

Content pillars

A few clear themes you post about, so your feed has a point of view.

A real calendar

A planned posting rhythm, scheduled ahead, so you never go quiet.

Captions in your voice

Written to sound like you, ready to post, every time.

One idea, many posts

Creating content from scratch every day is exhausting and it is why most owners quit. We work the other way. One strong idea becomes a week of content across every platform.

1 One idea or moment

A new product, a behind-the-scenes clip, a customer win, a tip.

2 Reshaped for each platform

The same idea becomes a reel, a carousel, a story, and a written post, each in the format that platform rewards.

3 Scheduled and posted

Your assistant queues it all in advance and watches the comments and messages for new customers.

WHAT YOU GET MONTHLY

A planned calendar, finished posts and captions, scheduling, and someone keeping an eye on the inbox so a real lead never sits unanswered.

Built by the same system

Our AI system drafts the content in your voice, your assistant refines and approves it, and nothing posts without a human saying yes. Fast and on-brand, with a person in control.
